

THE PROCESS

FUTURE OF BUS WASHING

Traditional to Revolutionary Washing~Saving Our water
Gallon By Gallon

WATER RECYCLING SYSTEM & WASH PAD

What Stands out from our Competitors:

- Reclaim Equipment.** Over 1,000 installations worldwide. Proven, compact & cost-effective.
- Design & Technical Support.** Integrated support to architect & General Contractor in all stages of design and build-out.
- Maintenance.** Exceptionally low with monthly service under one hour. Due to automated filter back flushing and the revolutionary "Triple Pump".
- Reliability.** 98%+ up time.
- Odor Free.** No "Germ" used for degreasing the water. No use of enzymes (bacteria) that need "looking after" to ensure an odor free environment.
- Extended Warranty.** 2 Years.

OUR COMPANY

Company Snapshot

Freylit is an international manufacturer of environmental systems & solutions to treat and control polluted water. Our systems feature advanced technology that is embedded into our *Equipment Wash Station Packages*.

Our tough standards meet stringent requirements that have been developed over 30 years of rigorous field testing in over 40 countries world wide.

Our Equipment Washing Station Packages were developed after careful consultation with leading equipment rental companies, where we evaluated problems and difficulties they encountered in the complete operation of washing both small and large bus wash operations. By the use of integrating special degerming and filtration systems with our renowned reclaim systems, we were able to bring to the equipment rental industry exciting packages that can use "closed loop systems", where the water is used over and over, in some cases for a year, while at the same time, keeping in check any foul smelling "odors", normally associated with reclaim water.

With installation at numerous Bus Wash Centers through out the US & Canada, Freylit brings a fresh look at the management of water recycling in the equipment rental industry.

PERFORMANCE

WASH PAD STATIONS
WATER RECYCLING SYSTEMS

AT YOUR SERVICE CENTER.

- Easy to Install

- Achieving Maximum Productivity
- Producing Consistent Quality
- Saving the Environment

- Robust Equipment
- Rigorous Field Tested
- Tough & Stringent Standards

POWERFUL

ACCREDITATION

"When I was a senior construction manager with corporate real estate with *Sunbelt Rentals* we worked with Neil Dick of Freylit with wash bay equipment in all markets throughout the United States. At the start of my time as Director of Facility Development & Construction & environmental affairs real state with Hertz Equipment Rental, now *HERC Rentals*, we were in the process of expanding throughout the USA and Canada. I decided to further reach out to *FREYLIT* based of their acute understanding of Environmental issues and there excellence in the field of equipment wash systems. Now after 18 months we have installed in excess of 25 systems & it is my opinion that Freylit is one of the better contractors I have collaborated with".
