OUR COMPANY

Company Snapshot

Freylit is an international manufacturer of environmental systems & solutions to treat and control polluted water. Our systems feature advanced technology that is embedded into our **Agriculture Wash Packages**.

Our tough standards meet stringent requirements that have been developed over 30 years of rigorous field testing in over 40 countries world wide.

Our **Agriculture Wash Equipment Packages** were developed after careful consultation with Agricultural Services Centers where we evaluated problems and difficulties they encountered in the complete operation of washing large scale agricultural equipment and the handling of the grain products associated with cleaning combine harvesters etc. By use of integrating special degerming and filtration with our renowned reclaim systems, we were able to bring to the Agricultural industry exciting packages that can allow "closed loop systems" where water is used over and over, in some cases for a year, while at the same time keeping in check any foul smelling "odors", normally associated with reclaim water.

With Installations at several **Agricultural Service Centers** in Ohio, Freylit brings a fresh look at the management of water recycling in the farming community.

WATER RECYCLING SYSTEM

Go Green

COMMITTED TO SATISFY

ACCREDITATION

BURKHART FARM CENTER, INC.-Ohio

"Planning our wash bay was a challenge for Freylit, because unlike a carwash, we wash tractors & combines right out of the field before we can service them or resell them. We have to contend with a lot of dirt, grease & debris. Freylit was up to the challenge and together we came up with a design to meet our needs. Installation went fast and easy and has worked flawlessly for over a year. I would highly recommend Freylit to anyone looking for a reclaim system".

Burkhart Farm Center
Chuck Burkhardt--Owner

PURSELL FARM, Alabama

"We have been running the new system for over a year now and we are pleased. Everyday I am on the grounds at the Farming Center I look over and am reminded of how nice of an area we have. The system continues to performed beautifully with almost no service and repairs. We spend our time washing! Meanwhile you are always available to answer little questions or needs that Mark and I have. Thanks for all you have done & thanks for the best reclaim wash center the industry has to offer".
