

WATER RECYCLING SYSTEM & WASH PAD

What Stands
FREYLIT
Environmental Technology
out from our
Competitors:

These KEY factors below provides a solid set of reasons as to why to install a Freylit Wash System.

Reclaim Equipment

The **CORE** of our Wash Station. Over 6,500 installations world wide. Robust, compact & well field tested and Environmental Friendly.

Design & Technical Support.

Intergrated support to Golf Course, Architect & General Contractor's in all stages of design and build out.

Vortex Pump

FREYLIT's Special Vortex Pump. Long Grass staples not cut by conventional centrifugal pump.

The **Vortex Pump** enables a strong **agitation line** to be added to provide an ability to clean away the grassy / sandy debris from accumulating in the Sump Pit, and thus reduces monthly maintenance.

Maintenance

Exceptionally low with monthly service under one hour, due to automated filter back flushing and the revolutionary "Freylit Vortex Pump"

Reliability.

98% + up time

Odor Free

No Ozone used for degerming the water. No use of enzymes (bacteria) that need "looking after" to ensure an odor free environment.

2 Years for the Reclaim System
5 Years for Vortex Pump
7 Years Expansion Tank

The Process.....

FREYLIT USA Inc.

OUR COMPANY

Company Snapshot

Freylit is an international manufacturer of environmental systems & solutions to treat & control polluted water. Our systems feature advanced technology that is embedded into our Golfing Wash Packages.

These tough standards meet stringent requirements that have been developed over 30 years of rigorous field testing in over 40 countries world wide.

Our Golf Course Wash Equipment Packages were developed after careful consultation with Superintendents where we evaluated problems & difficulties they encountered in the complete operation of washing turf equipment and the handling of the grass debris. By use of a special lift pump intergrated with our renowned reclaim systems, we're able to bring to the Golfing Industry exciting packages that can allow **closed loop systems** where water is used over and over, in some cases for several years, while at the same time keeping in check any "odor".

With installations at Pursell Farms [Farmlinks Golf Course], PGA courses & other prestigious Golf Clubs around the country, Freylit brings a fresh look at the management of water and grass debris at golf maintenance facilities.

OCTOBER 2023-Freylit Announces **NEW** Reclaim Equipment

EXTRA PERFORMANCE

WASH PAD STATIONS
WATER RECYCLING SYSTEMS

UPDATED FEATURES

2023 Model Features

- * Integrated Microprocessor Technology
- * All Polypropylene and Stainless Steel Components

**Robust Equipment
Rigorous Field Tested
Tough & Stringent Standards**

POWERFUL

COMMITTED TO SATISFY

QUALITY

We have been running the new system for over a year now and we are so pleased. Every day I am on the grounds at the Agronomy Center I look over and am reminded of how nice an area we have. The system continues to perform beautifully with almost no service and repairs.

*Mark Langner - Director of Agronomy
Pursell Farms/ Farmlinks Golf Club*

Dear Neil Dick,
I would like to extend my sincerest thanks to you and Freylit for doing an outstanding job in instaling and maintaining the wash pad at Quail Hollow Club. It has revolutionized our equipment cleaning process.

*Jeffrey A. Kent - Golf Superintendent
Quail Hollow Club*

We are very happy with our decision to use Freylit, and we are very happy with the service and quality we have received. I will tell anyone who ask about our wash systems that Freylit is the best I have used, & should be at the top of the list for anyone who is looking to upgrade.
