OUR COMPANY

PERFORMANCE

ACCREDITATION

Company Snapshot

Freylit is an international manufacturer of environmental systems & solutions to treat and control polluted water. Our systems feature advanced technology that is embedded into our **Agriculture Wash Packages**.

Our tough standards meet stringent requirements that have been developed over 30 years of rigorous field testing in over 40 countries world wide.

Our **Wash Equipment Packages** were developed after careful consultation with Agricultural Services Centers where we evaluated problems and difficulties they encountered in the complete operation of washing large scale equipment and the handling of the heavy mud associated with cleaning heavy equipment. By use of integrating special dewatering and filtration with our renowned reclaim systems, we are able to bring to the industry exciting packages that can allow "closed loop systems" where water is used over and over, in some cases for a year, while at the same time keeping in check any foul smelling "odors", normally associated with reclaim water.

With Installations at several **Equipment Service Centers** in Ohio, Freylit brings a fresh look at the management of water recycling in the washing construction and heavy equipment.

WASH PAD STATIONS WITH WATER RECYCLING SYSTEMS

AT YOUR SERVICE CENTER.

- Easy to Install
- Compact Design
- Almost Maintenance Free
